The screenshot displays the configuration of DNS on two PCs in Cisco Packet Tracer. The top window shows the configuration for PC0, and the bottom window shows the configuration for PC0(2). Both windows have the 'Services' tab selected, and the 'DNS' service is turned on. The 'Resource Records' section shows the configuration for the domain 'pendikomupi.com'.

**PC0 Configuration:**

- DNS Service: ☒ On
- Resource Records:
  - Name: pendikomupi.com
  - Type: A Record
  - Address: 192.168.3.2

**PC0(2) Configuration:**

- DNS Service: ☒ On
- Resource Records:
  - Name: pendikomupi.com
  - Type: A Record
  - Address: 192.168.3.2

The 'Quick Links' section in both windows includes links for 'A small page', 'Copyrights', 'Image page', and 'Image'.
